Performance Ethnography Norman K. Denzin 2003-06-24 In Performance Ethnography, one of the world’s most distinguished authorities on qualitative research, established the initial published connection of performance narratives with performance ethnography and autoethnography; the linkage of these formations to critical pedagogy and critical race theory; and the histories of these formations, and shown how they may be connected. Performance Ethnography is divided into three parts. Part I covers pedagogy, ethnography, performance, and theory as the foundation for a performative social science. Part II addresses the worlds of family, nature, praxis, and action, employing a structure that is equal parts memoir, essay, short story, and literary autoethnography. Part III examines the ethics and practical politics of performance autoethnography, anchored in the post-9/11 discourse in the United States. The amalgam serves as an invitation for social scientists and ethnographers to confront the politics of cultural studies and explore the multiple ways in which performance and ethnography can be both better understood and used as mechanisms for social change and economic justice.

Playbuilding as Qualitative Research Joe Norris 2017-03-02 This book is for both art-based researchers and research-informed artists, exploring the theatrical genre known as Collective Creation, or Playbuilding. Performers generate data around chosen topics— from addiction and sexuality to qualitative research—by compiling scenes from their disparate voices. Audience members become involved in the investigation, and the performed scenes do not end the conversation but challenge and extend it. Through discussion and audience participation, the process examines how knowledge is defined and how data is mediated.

Researching drama and arts education Edited by Philip Taylor., 2012-11-12 This volume examines the current major issues in research design for arts teachers. It aims to answer two key questions: how do researchers design their studies? What research methods are appropriate for specific investigative questions?

Research Methodologies for Drama Education Judith Ackroyd 2006 Drama education has been lacking a research methodology. This much needed text provides models constructed by leading researchers in the field and presented at the International Drama in Education Research Institute Conference in 2004. Each chapter in this collection from across the Anglophone world describes a different research methodology. It explains how the methodology was applied to the practice and outlines how teachers and other researchers can employ it in their own contexts. Led by the editor’s chapter on the context of research, the contributions include: The Process of Institute Research Stations by Philip Taylor The Reflective Practitioner by Jonathan Neelands Critical Ethnography by Kathleen Gallagher Narrative Inquiry by Bellarie Zatzman A case study by Joe Winston Performance Ethnography by Jane Bacon Post-structuralist Deconstruction by Ian McCormick Feminist Methodology by Sharon Grady The book will be essential reading for research students and teachers because it provides models and approaches that connect with the immediacy of their practice.

The Routledge Introduction to Theatre and Performance Studies Erika Fischer-Lichte 2014-04-03 Erika Fischer-Lichte’s introduction to the discipline of Theatre and Performance Studies is a strikingly authoritative and wide ranging guide to the study of theatre in all of its forms. Its three-part structure moves from the first steps in starting to think about performance, through to the diverse and interrelated concerns required of higher-level study: Part 1 – Central Concepts for Theatre and Performance Research – introduces the language and key ideas that are used to discuss and think about theatre: concepts of performance; the emergence of meaning; and the theatrical event as an experience shared by actors and spectators. Part 1 contextualizes these concepts by tracing the history of Theatre and Performance Studies as a discipline. Part 2 – Fields, Theories and Methods – looks at how to analyse a performance and how to conduct theatre-historiographical research. This section is concerned with the ‘doing’ of Theatre and Performance Studies: establishing and understanding different methodological approaches; using sources effectively; and building theoretical frameworks. Part 3 – Pushing Boundaries – expands on the lessons of Parts 1 and 2 in order to engage with theatre and performance in a global context. Part 3 introduces the concept of ‘interweaving performance cultures’; explores the interrelation of theatre with the other arts; and develops a transformative aesthetics of performance. Case studies throughout the book root its theoretical discussion in theatrical practice. Focused accounts of plays, practitioners and performances map the development of Theatre and Performance Studies as an academic discipline, and of the theatre itself as an art form. This is the most comprehensive and sophisticated introduction to the field available, written by one of its foremost scholars.

Practice-as-Research L. Allegue 2009-08-11 Practice-as-Research: In Performance and Screen presents a thoroughgoing exploration of the major fissures of established knowledge created by a new trans-disciplinary, worldwide project for the twenty-first century. Focussing on the most fleeting and yet pervasive practices of the performance and screen arts, it both documents and analyses the practical-theoretical integration of hands-on creative and scholarly methods of research. Through an innovative combination of manuscript, catalogue and digital multi-media formats, it aims to embody the principles of performance and screen practice-as-research in its structure and design – making book pages and DVD images mutually illuminating. With over fifty practitioner-researcher contributors, Practice-as-Research constitutes the most comprehensive presentation of this sometimes controversial and frequently fresh way of doing things with an imaginative convergence of artistic and scholarly processes.

Arts-Based Educational Research and Qualitative Inquiry Thalia M. Mulvihill 2019-11-04 Arts-Based Educational Research and Qualitative Inquiry introduces novice qualitative researchers, within education and related fields, to arts-based educational research (ABER). Abundant prompts and exercises are provided to help readers use the concepts and experiment with various applications of the ideas presented. The authors walk the path with novice researchers offering a variety of approaches to the practice of arts-based methods, while providing a guided overview of ABER, and include pedagogical features in each chapter. Exercises are designed to assist educational researchers who wish to expand their repertoire of methodologies. The authors also weave into the discussion the possibilities and limitations of many types of arts-based methods while introducing readers to the growing methodological literature. By offering a tapestry of ways to engage the novice researcher, the book illustrates that it is not always possible to separate cognitive findings from aesthetic knowing. This book will help qualitative researchers to expand their methodologies to include arts-based approaches to their projects and by doing so reshape their identities as qualitative researchers. It also offers some evaluative criteria and tool kits for experimenting with various arts and educational research.

Somatic Voices in Performance Research and Beyond Christina Kapadoca 2020-10-21 Somatic Voices in Performance Research and Beyond brings together a community of international practitioner-researchers who explore voice through soma or soma through voice. Negotiating Opportunities Jessica McCrory Calarco 2018-02-01 In Negotiating Opportunities, Jessica McCrory Calarco argues that the middle class has a negotiated advantage in school. Drawing on five years of ethnographic fieldwork, Calarco traces that negotiated advantage from its origins at home to its consequences at school. Through their parents’ coaching, working-class students learn to follow rules and work through problems independently. Middle-class students learn to challenge rules and request assistance, accommodations, and attention in excess of what is fair or required. Teachers typically grant those requests, creating advantages for middle-class students. Calarco concludes with recommendations, advocating against deficit-oriented programs that teach middle-class behaviors to working-class students. Those programs ignore the value of working-class students’ resourcefulness, respect, and responsibility, and they do little to prevent middle-class families from finding new opportunities to negotiate advantages in school.

Ethnodrama Johnny Saldaña 2005 Seven ethnodramas illustrate this emerging genre of arts-based research, a burgeoning but evident trend in the field of theatre production itself. With their focus on the personal, immediate and contextual, these plays about marginalized identities, abortion, street life and oppression manage a unique balance between theoretical research and everyday realism.

Theatre and Audience Lois Weaver 2017-09-16 What does theatre do for – and to – those who witness, watch, and participate in it? Theatre & Audience provides a provocative overview of the questions raised by theatrical encounters between performers and audiences. Focusing on European and North American theatre and its audiences in the twentieth and twenty-first centuries, it explores belief in theatre’s potential to influence, impact and transform. Illustrated by examples of performance which have sought to generate active audience involvement – from Brecht’s epic theatre to the Blue Man Group – it seeks to unsettle any simple equation between audience participation and empowerment.

Foreword by Lois Weaver.

Theatre Translation Angela Tiziana Tarantini 2021-07-19 This book examines the effects of translation on theatrical performance. The author adapts and applies Kershaw et al.’s Practice as Research model to an empirical investigation analysing the effects of translation on the rhythm and gesture of a playtext in performance, using the contemporary plays Convincing Ground and The Gully by Australian playwright David Mence which have been translated into Italian. The book is divided into two parts: a theoretical exegesis encompassing Translation Studies, Performance Studies and Gesture Studies, and a practical investigation comprising of a workshop where excerpts of the plays are explored by two groups of actors. The chapters are accompanied by short clips of the performance workshop hosted on SpringerLink. The book will be of interest to students and scholars in the fields of Translation Studies (and Theatre Translation more specifically), Theatre and Performance, and Gesture Studies.

Research as Data Miguel Escobar Varela 2021-08-02 In Theater as Data, Miguel Escobar Varela explores the use of computational methods and digital data in theater research. He considers the implications of these new approaches, and explains the roles that statistics and visualizations play. Reflecting on recent debates in the humanities, the author suggests that there are two ways of using data, both of which have a place in theater research. Data-driven methods are closer to the pursuit of verifiable results common in the sciences; and data-assisted methods are closer to the interpretive traditions of the humanities. The book surveys four major areas within theater scholarship: texts (not only playscripts but also theater reviews and program booklets); relationships (both the links between fictional characters and the collaborative networks of artists and producers); motion (the movement of performers and objects on stage); and locations (the coordinates of performance events, venues, and touring circuits). Theater as Data examines important contributions to theater studies from similar computational research, including in classical French drama, collaboration networks in Australian theater, contemporary Portuguese choreography, and global productions of Ibsen. This overview is complemented by short descriptions of the author’s own work in the computational analysis of theater practices in Singapore and Indonesia. The author ends by considering the future of computational theater research, underlining the importance of open data and digital sustainability practices, and encouraging readers to consider the benefits of learning to code. A web companion offers illustrative data, programming tutorials, and videos.

Applied Theatre: Research Peter O’Connor 2015-02-26 Applied Theatre: Research is the first book to consolidate thinking about applied theatre as research through a thorough investigation of ATAR as a research methodology. It will be an indispensable resource for teachers and researchers in the area. The first section of the book details the history of the relationship between applied theatre and research, especially in the area of evaluation and impact assessment, and offering an examination of the literature surrounding applied theatre and research. The book then explores how applied theatre as research (ATAR) works as a democratic and pro-social adjunct to community based research and explains its complex relationship to arts informed inquiry, Indigenous research methods and other research epistemologies. The book provides a rationale for this approach focusing on its capacity for reciprocity within communities. The second part of the book provides a series of international case studies of effective practice which detail some of the key approaches in the method and based on work conducted in Australia, New Zealand, Singapore and the South Pacific. The case studies provide a range of cultural contexts for the playing out of various forms of ATAR, and a concluding chapter considers the tensions and the possibilities inherent in ATAR. This is a groundbreaking book for all researchers who are working with communities who require a method that moves beyond current research practice.

The Self in Performance Susana Pendzik 2017-01-10 This book is the first to examine the performance of autobiographical material as a theatrical form, a research subject, and a therapeutic method. It thus provides insights into a range of Autobiographic Therapeutic Performance forms, including Self-Revelatory and Autoethnographic Performance. Addressing issues of identity, memory, authenticity, self-reflection, self-indulgence, and embodied self-representation, the book presents, with both breadth and depth, a look at this fascinating field, gathering contributions by notable professionals around the world. Methods and approaches are illustrated with case examples that range from clients in private practice in California, through students in drama therapy training in the UK, to inmates in Lebanese prisons.

Japanese Imperialism, 1894-1945 William G. Beasley 1987 This is a study of the origins and nature of Japanese imperialism from the Sino-Japanese war of 1894-1895 through to 1945. Japan is the only Asian country in modern times to have built both a successful industrial economy and an empire, and it is Professor Beasley’s contention that these two phenomena are closely related. Japan’s aims were influenced by its experience of western imperialism and its own growing industrialization, but as external circumstances changed and Japan’s capacitygrew, so did its needs and ambitions. The creation of the Japanese empire is one of the most remarkable exploits of the twentieth century. Professor Beasley has provided a much-needed scholarly investigation into its development, expansion, and eventual destruction.

The Cambridge Companion to Performance Studies Tracy C. Davis 2008-11-13 Since the turn of the century, Performance Studies has emerged as an increasingly vibrant discipline. Its concerns - embodiment, ethical research and social change - are held in common with many other fields, however a unique combination of methods and applications is used in exploration of the discipline. Bridging live art practices - theatre, performance art and dance - with technological media, and social sciences with humanities, it is truly hybrid and experimental in its techniques. This Companion brings together specially commissioned essays from leading scholars who reflect on their own experiences in Performance Studies and the possibilities this offers to representations of identity, self-and-other, and communities. Theories which have been absorbed into the field are applied to compelling topics in current academic, artistic and community settings. The collection is designed to reflect the diversity of outlooks and provide a guide for students as well as scholars seeking a perspective on research trends.

The SAGE Handbook of Performance Studies Judith A. Hamera 2006 Publisher description

Performance as Research Annette Arlander 2017-12-06 Performance as Research (PAR) is characterised by an extraordinary elasticity and interdisciplinary drive. Performance as Research: Knowledge, Methods, Impact celebrates this energy, bringing together chapters from a wide range of disciplines and eight different countries. This volume focuses explicitly on three critical, often contentious themes that run through much discussion of PaR as a discipline: Knowledge - the areas and manners in which performance can generate knowledge Methods - methods and methodologies for approaching performance as research Impact - a broad understanding of the impact of this form of research These themes are framed by four essays from the book’s editors, contextualising their interrelated conversations, teasing out common threads, and exploring the new questions that the contributions pose to the field of performance. As both an intervention into and extension of current debates, this is a vital collection for any reader concerned with the value and legitimacy of performance as research.

[Ethnodramatherapy](#) Stephen Snow 2021-11 "Ethnodramatherapy explores the integration of the performance ethnography method, known as ethnodrama, with the principles and practices of drama therapy to establish a sound theoretical formulation for ethnodramatherapy, and considers its use as art, as therapy, as research and as a vehicle for social justice. The book begins by defining ethnodramatherapy - an original synthesis created by the author through deep study and practice of Mienczakowski's ethnodrama, combined with thirty-five years of his own practice and research in drama therapy, creative arts therapies and therapeutic theatre. The book describes the origins of ethnodramatherapy, along with its evolution and method. It then delves into applications of the practice highlighted by five case studies with different audiences in different settings. Subjects include adults with developmental disabilities, female adolescents in youth protection, caregivers for loved ones with mental illnesses and Chinese students exploring controversial issues of oppression in China. Complex ethical issues are reviewed and suggestions are made on how to deal with some of the challenging ethical situations that are likely to arise in the ethnodramatherapy process. What emerges is a powerful tool that harnesses theatrical art, ethnographic research and the clinical techniques of drama therapy to create a potential for emancipatory experience for both performers and audiences. This exciting and dynamic synthesis of drama therapy, performance ethnography, theatrical art and social activism will be of interest to the whole community of theatre practitioners and scholars who use theatre to effect individual and social change, including the disciplines of applied theatre, theatre education, experimental theatre, performance studies, and, of course, drama therapy, psychodrama and the other creative arts therapies"--
